CASE STUDY

Contractor	Project Name	Type	Contact Details
Melbourne Property Rescue	Balinese Doors	EHB/ERC Colouring	http://www.timbabuild.com.au/

This case study involves the restoration of a £15k pair of Balinese Doors for a client in Malvern, Victoria (Australia) through Melbourne Property Rescue.

The client had used various trades/companies to undertake restoration and maintenance works to these doors but was unhappy with results and quality of finish.

Special techniques are used for **colouring the epoxy** to mimic timber and timber defects. Also overlaying different coloured layers to better achieve these results.

End results were terrific, I think you'll agree.
